Hyderabad, India – 500001

Summary

Third-year CSE student at Amrita Vishwa Vidyapeetham with strong skills in full-stack development, ML, IoT, and edge computing. Experienced in building scalable web applications and algorithmic systems with strong DSA fundamentals.

Education

B.Tech – Computer Science Engineering

Amrita Vishwa Vidyapeetham, Coimbatore

— CGPA: 7.78 — Currently 6th Semester

Technical Skills

Languages: JavaScript, Python, C/C++, HTML5, CSS3

Technologies: React.js, Node.js, Express.js, FastAPI, MongoDB, PostgreSQL, REST APIs

Specializations: Full-Stack Development, Machine Learning, IoT, Edge Computing, DSA

Work Experience

Software Developer – M/S Kiran Constructions

December 2025 – Present

- Developing software applications for project management and scheduling, supporting construction workflow optimization
- Implementing material tracking systems and contributing to digital transformation initiatives
- Enhancing operational efficiency through automation and data-driven solutions

Intern – SiliconWireless

January 2026 – March 2026

- Working on software and firmware components for biometric security devices including facial recognition and fingerprint scanning systems
- Assisting in integrating hardware security modules with backend services for authentication and access control
- Contributing to testing, debugging, and optimization of product-level security workflows in a product-based environment
- Gaining exposure to embedded systems, secure device communication, and real-world product development cycles

Projects

Simplify – IoT Edge Computing Scheduler

Developed an intelligent resource scheduling system for IoT edge computing using ML algorithms for predictive workload management and optimization.

Full-Stack Web Applications

Built scalable MERN stack applications with RESTful APIs, user authentication, and responsive design for enhanced user experience.

Achievements & Interests

- Merit recognition in multiple hackathons for AI/ML and full-stack applications
- Strong interest in IoT systems, Data Structures & Algorithms, and Machine Learning
